

REPEL™ BALLISTIC SHIELD

Global ShieldTech Limited is pleased to announce the introduction of the REPEL™ Ballistic Shield, which incorporates ballistic resistant materials. REPEL™ is an Anti Boarding and Anti Piracy Barrier.

REPEL™ Ballistic Shield complements the original Repel™ system and can be used to provide secure locations at intervals on deck for personnel and critical equipment whilst under attack or from stray shots from intruders carrying fire arms.

The REPEL™ Ballistic Shield conforms to a Ballistic rating of FB6 to ensure protection from an M80 NATO Ball bullet as used in AK-47 rifles which are generally used in Piracy and Terrorist activities.

A Ballistic rating of FB7 or alternative can be provided.

The REPEL™ Ballistic Shield is available to Vessels, Offshore Platforms and FSPO's in High Risk Areas and many other craft and installations, and can provide a secure shelter for crew to use if under fire whilst proceeding on deck to a safe citadel.
